

AECON INFRASTRUCTURE

Aecon Construction and Materials Limited

HWY 11 – VERNON LAKE NARROWS

CLIENT:

Ministry of Transportation of Ontario

ENGINEER:

Lea Consulting Ltd.

CONTRACT VALUE:

\$19.1 million

PROJECT LOCATION:

Hwy 11 from 5.05 km south of Hwy 60, n'ly 5.3 km

CONSTRUCTION PERIOD:

July 2008 – July 2010

PROJECT DETAILS:

Contract 2008-5001 – Grading, Drainage, Granular Base, Hot Mix Paving, Electrical and Structure Replacement

Reconstruction of a 5 km stretch of Highway 11 in Huntsville, Ontario. Under the contract, Aecon will remove the existing southbound bridge structure on Highway 11 at Lake Vernon near Huntsville, and will build a new southbound bridge in its place. The project involves a unique construction challenge in an environmentally sensitive lake, and will be completed using predominantly marine capabilities. Marine barges will be used to remove the existing eight piers in Lake Vernon, and to build four piers for the new 235 meter long, five span bridge structure.

"The environmental aspects of this project are unique, and as the work is located in a sensitive area, the use of Aecon's marine capabilities will ensure that the project is completed with the utmost respect for the surrounding environment," said Teri McKibbon, CEO of Aecon's Infrastructure group.
