Amec
Danya Cebus, a subsidiary of Africa Israel Investments
Solel Boneh, a subsidiary of Housing & Construction Holding Company

Contract Value:

\$1.2 Billion

Project Location:

Tel Aviv, Israel

Project Description:

The overall project consists of the Development, Financing, Design, Build and 30 year operation of an 87 km all electronic toll highway near Tel Aviv, in Israel.

The construction component comprises 13 interchanges, 88 bridges, a pair of three lane tunnels and 87 km of 4 to 6 lane throughway.

The 4-1/2 year construction program includes 19 million m³ of cut and fill, 3.5 million tonnes of granular base and sub-base and 1.5 million tonnes of asphalt. Approximately, 250,000 m³ of concrete are being batched for bridges and interchanges.
